Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 21 April 2004 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 2, 5, 7, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Zabeck et al. (US Patent Number 5,503,366).

Zabeck et al. disclose a valve assembly comprising: a valve body defining an inlet, a controlled outlet and a passageway therebetween; a valve stop (6) and a valve seat (9) supported within said valve body in axial alignment with said controlled outlet; and a plunger (3) reciprocable between the valve stop and the valve seat to open and close said controlled outlet, said plunger further including a central bore (37) having an insert (25) molded (see column 4, lines 44-47) therein to define a dome-shaped stop-cushion (22) at an end proximal the valve stop

Art Unit: 3754

and a valve tip (8) at an end proximal the valve seat, wherein the plunger has a pocket and the valve stop and the spring (5) are disposed partially within the pocket (see Fig. 1); wherein a solenoid actuator (2) is operable on said plunger to open and close said passageway; and further comprising a non-conductive insert (15).

Allowable Subject Matter

4. Claims 3, 4, 8, 10-12, and 14 are allowed.
5. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments filed 21 April 2004 have been fully considered but they are not persuasive. Applicant argues that the limitation "dome-shaped" distinguishes claim 2 over Zabeck et al. The examiner disagrees. The term "dome-shaped" has not been given any special definition that would distinguish it from stop cushion of Zabeck et al. The claim does not require the "dome-shape" to be concave or convex. Also, applicant's "dome-shaped" stop cushion (84) is not hemispherical, but is substantially flat across most of its surface (see Fig. 1). So "dome-shaped" must be read broadly to find support in the application.
